

Marsh Farm Estate Regeneration

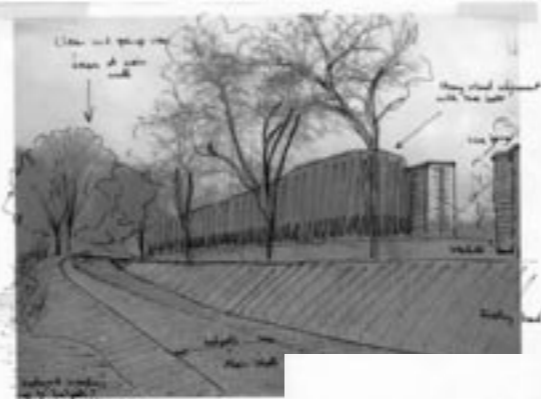

An urban regeneration masterplan for the Marsh Farm estate, Luton, UK

A PRP project in which I participated in the masterplanning and public consultation team, alongside urban designers and architects.

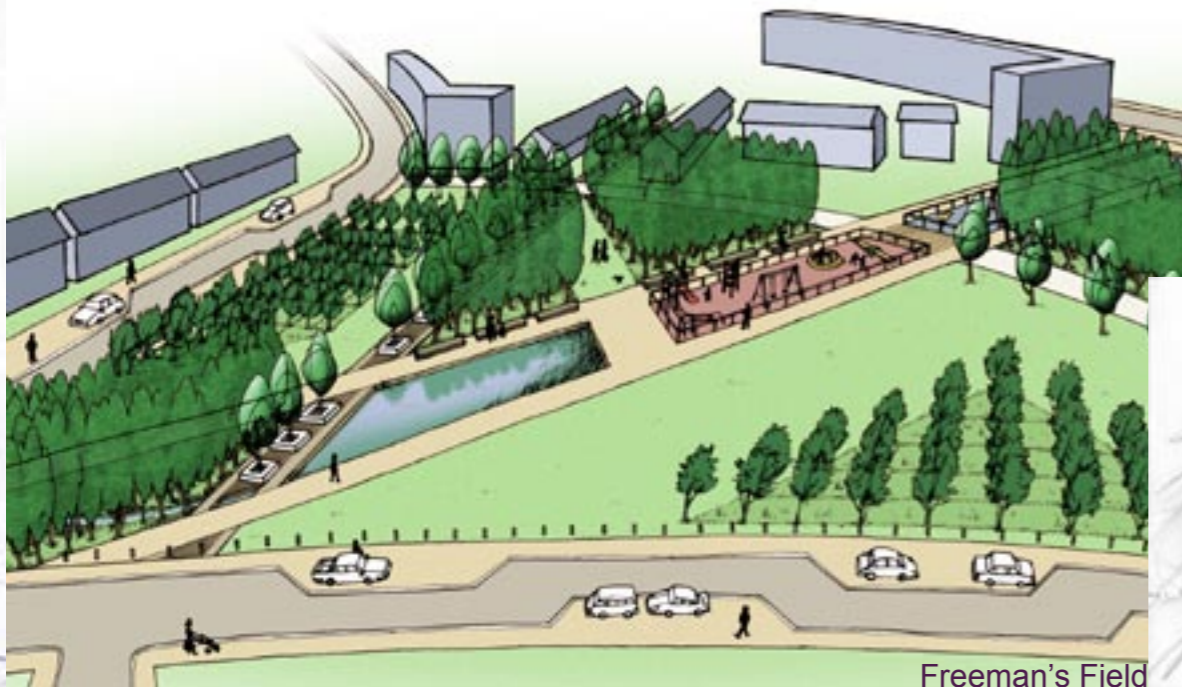

The masterplan and landscape strategy aimed at solving physical problems associated with the Raburn layout, as well as appropriating the setting of significant landscape and heritage assets. The proposals included a new town centre and market square, local parks, tree belts, wetlands restoration and SUDS.
