

# Ocean Estate Regeneration

A masterplan for the regeneration of Ocean Estate in east London, UK

A PRP project in which I participated in the masterplanning and consultation team, alongside urban designers and architects.

The landscape strategy aimed to diversify and improve the quality of open space, establish a legible hierarchy of streets and homezones and implement Secure-by-Design principles.

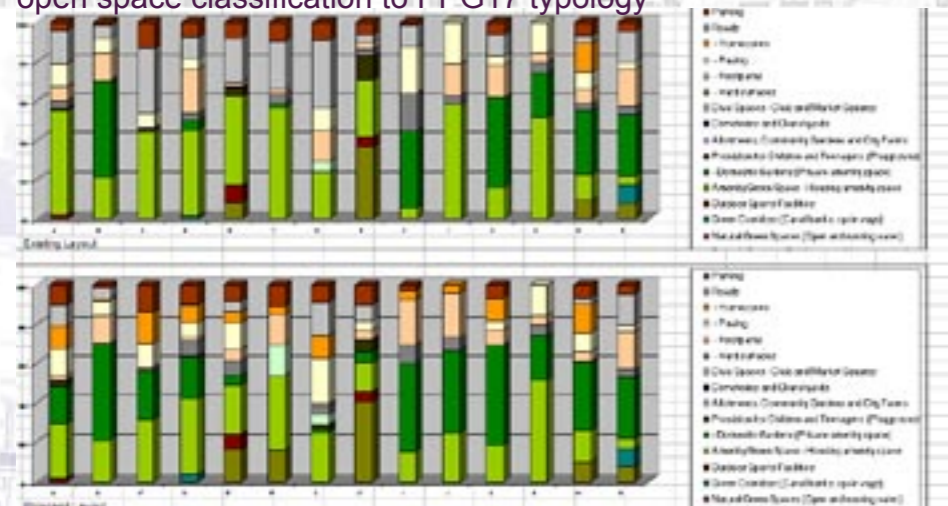

reorganising space - parking and vehicular access make way for homezones and play areas

open space classification to PPG17 typology

masterplan

3D masterplan

comparison of existing and proposed open space provision (to PPG17 typology)

continuous open space - greens, streetscape, shared gardens, homezones, squares and parks

introducing homezones and shared gardens
